

QUALITY, HEALTH, SAFETY AND ENVIRONMENT POLICY

The long-term business success of Ocean Rig depends on our ability to continually improve the quality of our services. We will operate our facilities in a safe and efficient manner and care for all those on our sites or impacted by our activities.

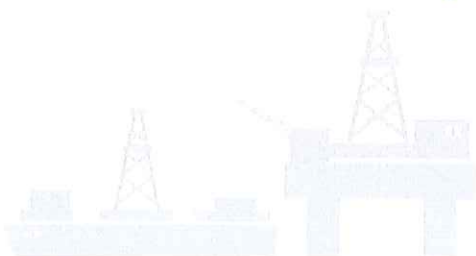

In Ocean Rig QHSE is an integral part of company's Operating Management System (OMS) at all levels and requires support from all employees. In addition, management has a leadership role in the communication, support and implementation of, a strong QHSE culture and ensuring compliance with company policies, OMS Requirements and procedures. Working safely and complying with all applicable regulatory and OMS requirements is a condition of employment. All who work for and with Ocean Rig are obliged and have the authority to stop work they consider unsafe or that contravenes regulatory or OMS requirements.

We will:

- Provide a framework for the setting of QHSE goals and performance objectives, and the use of an effective Operating Management System in order to meet company, customer & regulatory requirements.
- Identify our risks, prioritise and manage them.
- Monitor, evaluate and continually improve company's performance through the definition of Key Performance Indicators and Performance Evaluation Factors in order to assess the effectiveness in meeting the company's objectives, goals, regulatory obligations, OMS Requirements and identifying opportunities for improvement.
- Be prepared to respond to any emergency.
- Minimize our impact on the environment through pollution prevention and control of emissions, the efficient use of natural resources and the reduction and recycling of waste.
- Perform audits to ensure that company operating activities are being carried out in accordance with regulatory and company OMS requirements.
- Communicate openly with interested parties and ensure understanding of our QHSE policy, programs and performance.
- Recognise those who contribute to improved HSE performance.
